

Federation of AB Gas Co-ops – Ste. Anne Natural Gas Co-op

*Notable Nominee –
Worker Safety Leadership Award*

- Ste. Anne Natural Gas Co-op has been active in developing a robust health and safety management system and has been committed to helping other Federation members with safety development through sharing by starting a Safety and HR consulting program to provide expertise; when companies in the same industry share safety information, chances of preventing incidents are greatly increased
- As a leader in worker safety innovation, a Learning Management System, Bistrainer, was implemented that enables SANG to provide field workers with electronic safety forms and a resource library containing OHS legislation, CSA documentation, equipment manuals, etc., while in the field; this has improved the safety culture of SANG and has lowered the probability and severity of workplace incidents
- Have a robust safety management system (SMS) which has reduced incidents and greatly reduced severity of those that did occur; SANG has had no lost-time incidents in over 4 years and severity rates for WCB claims is extremely low
- SANG Co-op designed their building to be a disaster recovery site for the community (commercial natural gas generator, a water source not dependent on public works and robust communication system)
